Summary

Full-stack developer with a background in project management at a NASDAQ-listed sports data company. Currently building a production website for BCS Koolitus as a Junior Software Engineer intern, using Java, Spring Boot and Vue.js with an AI-first, spec-driven approach. Completing the Junior AI Full-Stack Developer program at Vali-IT!. Brings experience in Jira workflows, KPI tracking and stakeholder coordination, and a track record of delivering accurate, time-sensitive work at scale.

Work experience

BCS Koolitus AS 10/2026 – 12/2026
Junior Software Engineer Intern Tallinn, Estonia
Greenfield website for BCS Koolitus, built with an AI-first, spec-driven approach. Team of three interns and a mentor. Launch planned for end of internship.

- Gathered requirements with the client, from the kickoff meeting to MoSCoW prioritization and defining user roles.
- Building a REST API with Java, Spring Boot and PostgreSQL, using Flyway migrations, Spring Security and JWT authentication with role-based access.
- Building the frontend with Vue 3, TypeScript, Pinia and Tailwind CSS, including login, automatic session refresh and role-based views.
- Integrating AI features with Spring AI, such as generating formatted course descriptions from curriculum PDFs and translating content between languages.
- Writing specs and implementation plans first, then turning them into working code with Claude Code and custom skills our team built, reviewing the output along the way.
- Working in weekly Scrum sprints with Jira, Confluence, Git, pull requests and demos to the product owner.

Sportradar AG 04/2024 – 05/2026
Senior Content Operations Specialist Tallinn, Estonia

- Co-owned and managed multiple cross-team projects, including a coverage enhancement initiative, collaborating across 8 internal teams and 3 additional products.
- Served as Content Creation Admin, acting as the key escalation point for high-priority issues, contributing to the end-to-end escalation process, including logging, reporting and building documentation templates in Confluence to ensure consistent resolution across all teams.
- Personally managed high-profile sporting event coverage across the full calendar year — including the tennis Grand Slams and upcoming FIFA World Cup — receiving positive client feedback for coverage quality and accuracy.
- Developed KPI frameworks and Confluence documentation to monitor team performance, while managing JIRA-based workflows to keep stakeholders aligned and deadlines on track.

NoCry OÜ 10/2022 – 03/2024
Amazon Listing Manager Tallinn, Estonia

- Managed a product portfolio of 50+ SKUs across 4 international markets (US, UK, Canada, Germany), including multi-variant listings and market-specific optimisation.
- Collaborated cross-functionally with shipping, purchasing, social media and sales teams to ensure seamless product operations and go-to-market execution.
- Optimised product listings through SEO management, Figma-based image creation and AI-powered tools to improve visibility and conversion.

Sportland Eesti AS 12/2018 – 10/2022
Assistant Store Manager Tallinn, Estonia

- Progressed from Cashier to Assistant Store Manager, supporting the Store Manager with daily operations, workforce planning, staff training and visual merchandising.
- Managed on-site e-store operations, bridging physical retail and digital sales channels.

🎓 Education & Training

Junior Full-Stack AI Developer 08/2026 – 10/2026 | Tallinn
Vali IT!
Intensive 2 month long retraining program covering full-stack development and AI integration. Hands-on work with Java, JavaScript, HTML, CSS, Vue, Spring, and PostgreSQL, including a group project. Program includes a practical training period followed by an internship phase.

Bachelor of Arts in Sports 08/2018 – 06/2021
Tallinn University Tallinn, Estonia

Primary and Secondary Education 08/2006 – 06/2018
Tallinn English College Tallinn, Estonia

🎸 Hobbies and Interests

Sports
Road cycling and endurance sports, with a focus on long-distance performance and structured training. I've also played basketball for several years and follow the sport closely. Overall, I'm a huge sports fan and enjoy staying active in whatever form that takes.

Technology
Passionate about programming and software development, with a strong drive toward continuous learning and skill development. Outside of coding, I enjoy PC building, having assembled several systems from scratch, including researching and selecting every component myself.
